

Working for you

Business 'Water' ideas:

The Nidd Vale Group's Follifoot site installed a water recycling plant which saves up to 80% of water.

Both Treves UK and The Green House have taken the simple step of installing water-saving devices in cisterns to cut down water usage.

Treves have also put in urinal flushing controls. Treves received an award from the Envirowise 'Big Splash' scheme for reducing their water usage. The company also safeguards against water pollution by utilising easy to understand colour-coded markings on water drains.

Goosemoor Organics collects waste water from basins and the canteen area, for re-use in the garden.
