Subject: Proposed Motorway Service Area at Kirby Hill - reference 17/03414/EIAMAJ

I find it quite unbelievable that a fourth planning application is being submitted to build a motorway service area at Kirby Hill despite the proposal being rejected by the Secretary of State three times in twenty years.

It seems ludicrous to me that there is a need for such a service in this area when there are similar services not too far away - namely Wetherby and Leeming Bar which apparently has planning permission to upgrade.

We consider ourselves very lucky to live in such a lovely area and feel that it is quite inappropriate for such a development to be built spoiling the rural landscape and of course such a large loss of valuable agricultural land is quite unacceptable. Furthermore, due to the size of the proposed service station this would be a huge visual intrusion by day and particularly by night due to the illumination.

I hope my viewson this subject will be taken into consideration.

Marion Watson.
